Portfolio

SUMMARY

Senior Business Analyst and a Product Lead with 10+ years of experience of success delivering high-impact solutions in **E-commerce, Government Services, and Supply Chain Management**. Passionate about modernizing legacy processes through AI-enhanced product features and Robotic Process Automation. successfully led the end-to-end delivery of a telehealth platform integrating predictive behavioral algorithms and compliant data architectures. Adept at guiding cross-functional teams through the full SDLC, ensuring products are not only functional but intelligent and data-driven.

WORK EXPERIENCE

TARENTO GROUP

Product Lead || Senior Business Analyst

April 2020 - Present

- **Diverse Project Experience:** Successfully managed projects across multiple sectors including e-commerce (e.g., Lulu Grocery), real estate (e.g., Property Guru, Singapore), government services (e.g., Facial Sludge Management for Odisha), and healthcare, demonstrating versatility in complex project environments.
- **Stakeholder Engagement:** Conducted comprehensive stakeholder sessions, extracting critical insights and translating them into actionable product strategies.
- **Agile Leadership:** Certified Scrum Master with advanced proficiency in Agile methodologies, expertly managing Scrum Ceremonies, sprint planning, and product backlog optimization. Excel at mitigating scope creep and actively contribute to User Acceptance Testing (UAT) activities, ensuring project success.
- **Process Automation:** Implemented UiPath RPA solutions to streamline User Acceptance Testing (UAT), reducing manual testing efforts by approximately 30%.
- **Data Visualization & Tracking:** Developed interactive Power BI dashboards for real-time project monitoring, enabling data-driven decision-making and enhanced project transparency.
- **Design Thinking:** Actively engaged in the design thinking process, utilizing design software such as FIGMA and Adobe XD to create user-friendly projects and product interfaces.
- **Project Monitoring:** Maintain a vigilant presence in daily scrum calls and consistently monitor project progress to align with project requirements.
- **Comprehensive Documentation:** Expertly crafted detailed project documents including SRS, BRD, PRD, ensuring clarity and precision in project execution.
- **Software Proficiency:** Hands-on experience with Microsoft Office tools, including Word, Presentation, Excel, Visio, and MS projects. Also, analytical tools like PowerBi and Looker Studio.

CEDCOSS Technologies Private Limited

Business Analyst

September 2017 - April 2020

EDUCATION

Amity University

B. Tech (Information Technology)

August 2007 - June 2011

Sri Balaji University (BITM), Pune

Post Graduate Diploma in Management (Telecom and Information Technology)

July 2012 - April 2014

PROJECTS

Pandora (SCM): Global Supply Chain Modernization & Inventory Optimization

March 2026 - Present

As a Business Analyst within the Inventory Information System (IIS) team at Pandora, I have the privilege of working on the supply chain backbones for the largest jewellery brand in the world. Managing global inventory at this scale is like solving a massive, moving data puzzle. When a piece of jewellery is crafted, sold, or moved between warehouses across different continents, the entire ecosystem needs to know about it in real-time.

I drive business analysis across three major global initiatives:

- **Unicorn Initiative:** Transitioning global store networks to modern, unified commerce and POS platforms.
- **HERO Initiative:** Enhancing inventory visibility to feed smart planning tools so our stores never run out of customer favourites.
- **Gemini Initiative:** Powering seamless e-commerce and third-party logistics (3PL) integrations in critical expanding regions like Brazil.

I involve in bridging the gap between our technical architects and global business teams mapping out data flows, identifying edge cases, and transforming operational store needs into clear software requirements.

Cellmark Recycling Order (SCM) November 2023 - February 2025

This is an Order Management System (OMS), ERP system with the Custom organized warehouse and Inventory management system integrated to it, that is been developed and subsequently integrated into the IFS Accounting system.

HCM – Health Campaign Management for Mozambique, Africa

February 2023 - October 2023

DIGIT is an open-source platform to enhance global public health capabilities. Its objective is to alleviate diseases of poverty by offering digital tools for health campaigns and disease surveillance. The platform provides flexibility and configuration in planning, managing, and executing health campaigns, ensuring meticulous monitoring, evaluation, and gap identification for program success.

Faecal Sludge Management System - Odisha Government

January 2022 - December 2022

FSM is a project by the Govt of Odisha, to digitize the process of sludge management (Sludge Collected / Sludge Treatment). Where the complete official manual process of the government was taken into digital flow and revamped according to the DIGIT Platform.

Arcade Therapeutics - StarStarter Rx's

January 2021 - December 2023

<https://arcadetherapeutics.com/starstarter-rx-research>

Spearheaded the development of a cross-platform mental health solution, translating complex clinical workflows into a seamless digital user experience.

Defined the functional requirements for integrating predictive Machine Learning models with clinical screening tools (PHQ-2/GAD-2) to enable real-time mental health tracking.

Managed the backlog for **HIPAA compliance** and data privacy, ensuring secure data exchange within the insurance and provider ecosystem.

Performance Metrics: Successfully launched the MVP and iterated based on user feedback, resulting in a **78% engagement rate** and significantly enhancing patient outcomes through early detection protocols.

Core Dining, Finland

January 2021 - October 2021

This is a Restaurant Management System application that is used by the Manager and waiters. The application has a role- based access for (Admin and Manager) and a tablet application (Waiters).
